

Imperial Innovations Create Lab manager

Imperial Innovations works with exciting university research at the earliest stage and develops it through to commercialisation. As part of this we have built an ecosystem of student and academic innovators across Imperial College called Imperial Create Lab, this role is to manage and grow that community and the associated technology commercialisation activities. The role is supported by Capital Enterprise's CAP scheme but seconded to Imperial Innovations as part of the Co.Create team within Technology Transfer.

Outline of role

- Plan and deliver the pre-accelerator Venture Catalyst Challenge; this includes
 - Producing an effective marketing campaign which attracts technology focused applications
 - Refining the pre-accelerator process to ensure that the majority of teams are able to show strong proof of market fit within the 6 week process
 - Continuing to work with a portfolio of student teams post VCC to ensure that they reach traction or funding milestones

- Further grow the Create Lab community by;
 - Implementing recruitment and branding mechanisms to reach deep in to departments to attract innovative students
 - Host a series of events which helps to build cross functional teams
 - Work with students to host several major events in a manner that drives community engagement
 - Contribute to the mentor pool and investor network both directly and via group activities
 - Continuously refine and develop mechanisms for engaging innovative students.

Salary will be £30,000 and the role is provided on a 1 year contract basis.
