

Imperial Innovations Co.Create Venture Growth Manager

Imperial Innovations works with exciting university research at the earliest stage and develops it through to commercialisation. You will be working with both academic and student founders to help them find prototype to product / market fit, set them up for success and attract the necessary team and investment to scale. The role is supported by Capital Enterprise's CAP scheme but seconded to Imperial Innovations as part of the Co.Create team within Technology Transfer.

Outline of role

- Further expand the network of investors in the pre-seed and seed space and develop a scalable mechanism for engaging them in Co.Create activities and portfolio companies.
- Contribute to the development of a network of early adopters, sector experts and senior figures for fast product feedback and advisory roles across a wide range of industries.
- Source soft funds for early Proof of Concept projects.
- Work closely with founders to find potential customers, shape commercial direction and create scalable solutions to address typical startup requirements around legal, PoC development, banking, team building etc.
- Actively seek out and assess potentially commercial technology and projects by becoming deeply involved in the Imperial academic community.
- Raise the profile of Co.Create and portfolio teams externally

Salary will be £45,000 and the role is provided on a 1 year contract basis.
